About the Program

The Certification in Cyber Security is a six-month course in the IT and Technology sector. It introduces learners to common security concepts, safe online practices, computer networks and ways to recognise digital risks. The course is intended to build foundational knowledge and help students understand how individuals and organisations can protect information and devices.

Learners can explore topics such as passwords, privacy, network security, malware awareness and basic incident response. The course can suit students and adults interested in technology, but it does not guarantee a job or professional qualification for every cyber security role. Ask an SCT Board authorised study centre for the current syllabus, learning mode and assessment details.

01

6 Months Total
Practical lab training along with theory

10th Pass
Minimum eligibility

02

03

Online Exam
Online exam and result at the end of the course

Board Certificate
Marksheet and certificate, online verification

04

Who is this course for?

- 10th pass students
- 12th pass students
- Technology learners
- Working professionals

Program Highlights

01
Security foundations
Learn basic concepts for protecting computers, accounts and information.

02
Network awareness
Explore how networks work and why they need security.

03
Safer online habits
Understand passwords, privacy and responsible use of digital services.

04
Threat awareness
Recognise common malware, scams and other digital risks.

05
Incident basics
Learn introductory steps for reporting and responding to security concerns.

06
Six-month course
Study foundational cyber security topics over six months.

Program Curriculum

Certification in Cyber Security · 6 Months · 5 Modules

MODULE 01

Module 1: Introduction to Cyber Security
» Security concepts
» Common cyber risks
» Personal data
» Responsible computing

MODULE 02

Module 2: Computer and Network Basics
» Computer components
» Operating system basics
» Network fundamentals
» Internet protocols

MODULE 03

Module 3: Online Safety and Threats
» Password safety
» Phishing awareness
» Malware basics
» Privacy practices

MODULE 04

Module 4: Security Controls
» Access control
» Updates and backups
» Firewalls overview
» Data protection

MODULE 05

Module 5: Incident Awareness
» Recognising incidents
» Basic reporting
» Response principles
» Security ethics

Skills & Tools

You will work hands-on with these during the course.

Password safety	**Networking**	**Linux basics**	**Threat awareness**
Risk awareness	**Data protection**	**Incident reporting**	**Digital ethics**

Career Opportunities

After the course you can work in these fields.

IT support assistant
IT support teams in businesses, schools or service organisations.

Help desk technician
Help desks and technical support departments.

Junior security assistant
Security teams, usually with further training and supervision.

Network support assistant
Network teams at businesses or managed service providers.

Computer lab assistant
Schools, training centres and computer laboratories.

Cyber safety educator
Community groups or training settings, with suitable communication skills.

Get Certified

After completing the course and passing the online exam, the Shaskiya Computer Training Board marksheet and certificate are given, which are verified on the website with a QR code.

FAQs

What is the eligibility for this course?
The listed minimum qualification is 10th Pass. Contact an SCT Board authorised study centre to confirm document requirements before applying.

How long is the course?
The course duration is six months. Ask the authorised study centre about the current schedule and attendance requirements.

What is the mode of study?
Study mode and available support may vary by centre. Contact an SCT Board authorised study centre to confirm the options available to you.

How is the course exam conducted?
Assessment and exam arrangements may vary. Ask the authorised study centre about the current format, schedule and requirements.
